## **GIG VENUES:**

**Safety:** Must be able to meet the specific standards of safety laws, as well as the promoter agrees to provide professional security for the event.

**Event Start:** The schedule must be informed prior to the production of the band.  
Sound & Light: The company responsible for the sound system must have professional level and deliver the system up to 2 hours before the scheduled time for the show.  
The band **DOES NOT have roadies, stage assistants, technician in P.A. or Lightning.**

It is extremely important that the promoter provides an auxiliary control of P.A., table, cables and microphone.

The promoter must deprive the dressing room for access only from production, cleaning, security and accredited.

During the passage of sound and presentation, make available 10 glasses of mineral water without gas, near the stage.

### **P.A.:**

Given the minimum specifications required, we do not have any brand for P.A. tables, monitors and peripherals, however, the house mix should be in the P.A. at a distance compatible with that of the location.

With power to cover all necessary area, we request a good volume without distortion and producing a sound frequency range between 20hz and 20khz.

Stereo processor rack and 24-band stereo (or higher) equalizer;  
08 Compressor channels;  
08 Gate channels;  
02 Equalizers (or 1 stereo) 24 bands for insert;

### **Monitors:**

Monitor table with 24 channels or more;  
System with 06 monitors or more;  
Preference for central channel for the Singer, counting on 2 monitors spots;  
Microphones and Direct-Box according to **Input-List**.
